

Arpit Yadav

Product Designer · Builds AI Agents · Gurugram, India

arpit.uxdesign@gmail.com · [Portfolio](#) · [in/arpit](#) · +91 99996 98486 · WhatsApp only

Product Designer with 9 years shipping at consumer scale. Lead UX at **wsup.ai** — an AI character platform with 1M+ monthly visits — where I codified the design language and architected the AI agent that ships production screens 12× faster. Previously at **BlueStacks** and **now.gg**.

01 CURRENT

wsup.ai / Lead Product Designer

2024 - PRESENT | REMOTE

Leading UX end-to-end — own the design system, core flows, and interaction model.

- Designed the surfaces driving 1M+ monthly visits and 17-minute avg sessions across web and mobile.
- Own Explore, Chat, Profile, and Credits — surfaces covering ~95% of user time.
- Codified the design language across web and mobile — 90+ tokens, 14 spacing values, 62 components — the substrate the Designer Agent reads from.

02 PROJECTS

Designer Agent / `wsup.ai` production

Ships on-brand production screens from my accumulated design taste. Reads 9 knowledge files (134 corrections, 142 tokens, 62 components), self-audits for token discipline, syncs the style guide, and writes every correction back to its own knowledge.

Stack — Claude Code · Figma MCP · Markdown knowledge files · Next.js

Result — 4h → 20m per screen · 12× faster · 100% token compliance

Reddit Growth Agent / Lab project

Researches threads, drafts context-aware comments, and posts via ADB on a real Android phone. Safety is the architecture — compliance checks, posting-cadence controls, and a 90/10 value-to-promotion rule.

Stack — Claude Code · Python · ADB

Result — 1 → 1,100 karma in 4 days · 45 comments · 0 bans

BlueStacks and now.gg / Lead Product Designer

2019 - 2024 | GURUGRAM | REMOTE

- **BlueStacks** — 500M+ users, 1B+ downloads. Unified the web platform around a dual-CTA strategy (download + instant play) and a 2M+ game discovery system. Owned UX for BlueStacks 5 (desktop), X (cloud), and Air (Mac) — three products, one design language.
 - **now.gg** — 100M+ users, ~10M monthly visits. Designed a three-layer discovery architecture and one-click in-browser play across 1,000+ games.
-

EnterPi Software Solutions / UX Designer

2018 - 2019 | HYDERABAD

Shipped SaaS and web products across client engagements under design lead Tejas Shah.

Fluidsoft & Altran / UX Designer, iOS Trainee

2017 - 2018 | GURUGRAM

Delivered desktop and mobile applications. Switched into UX from iOS development at Altran (Aricent) after discovering design on the IKEA project — self-taught via Interaction Design Foundation.

04 SKILLS

DESIGN	Design Systems · Design Tokens · Interaction Design · Information Architecture · Visual Design · Prototyping · Dark Theme · Accessibility · Figma
AI & AGENTS	AI Agent Architecture · Human–AI Interaction · Knowledge File Architecture · Self-Auditing Agents · Prompt Engineering
RESEARCH	Interviews · Usability Testing · Competitive Analysis · Heuristics · User Journeys · A/B Testing
AI DEVELOPMENT	Claude Code · Figma MCP · AI-Assisted Development · Knowledge Base Engineering — ships production code in Next.js, React, Tailwind, TypeScript

05 CERTIFICATIONS

IIT Delhi · Design Thinking and Innovation — Continuing Education Programme, Centre for Rural Development & Technology	2021
Interaction Design Foundation · Design Thinking: The Beginner's Guide — Distinction, Top 10% in class	2019
Interaction Design Foundation · Mobile User Experience (UX) Design — Early UX foundations alongside iOS work at Altran	2017

06 EDUCATION

Master of Computer Application · BITs, Noida
Computer science foundation — shapes how I collaborate with engineering and architect design systems.
Bachelor of Science, Computer Science · SGGs, University of Delhi
Co-founded Invictus, a creative society that won filmmaking awards at IIT Delhi and elsewhere — early experience in storytelling and visual craft.
